

FLP-SG50 VS/1

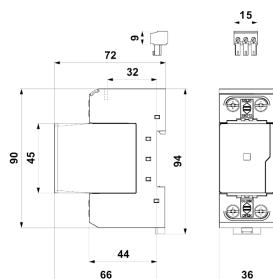

SPD type 1 - Lightning Current Arrestor

pluggable module, visual fault signalling, module locking, remote fault signalling
 encapsulated high-performance spark gap, installation at the boundary of zones LPZ 0 and LPZ 1 or higher, mainly to main distribution boards, for protection against impact of direct or indirect lightning strikes in the hardest application in heavy, chemical and energy industry, coordination with SPD type 2 (SLP-275 V) even without surge separating inductors
